

1364/1367SK

“PTFE with durable Aramid corners”

1364 combines white PTFE yarn with yellow Aramid corners.

Combining these two yarns provides excellent chemical compatibility with durable corners to prevent packing extrusion.

Construction: Interwoven braid.

Temperature Range: 500° F

pH Range: 1-12

Pressure: 600 PSI in pumps; 2800 in plunger pumps

Shaft Speed: 1,500 FPM

Service: Used for sealing slow/large mixer shafts. Aramid corners prevent packing extrusion while being chemically compatible with most fluids.

When ordering, please specify style, size, quantity and packaging desired.
