

## 1364/1367SK

*“PTFE with durable Aramid corners”*

1364 combines white PTFE yarn with yellow Aramid corners.

Combining these two yarns provides excellent chemical compatibility with durable corners to prevent packing extrusion.

**Construction:** Interwoven braid.

**Temperature Range:** 500° F

**pH Range:** 1-12

**Pressure:** 600 PSI in pumps; 2800 in plunger pumps

**Shaft Speed:** 1,500 FPM

**Service:** Used for sealing slow/large mixer shafts. Aramid corners prevent packing extrusion while being chemically compatible with most fluids.

When ordering, please specify style, size, quantity and packaging desired.
